

## STATEMENT ON COVID 19 IMPACT

Sunbelt Corporation is monitoring the worldwide Covid-19 emergency on a continuing basis, giving particular attention to how potential events, outside of our local control, may impact on our ability to meet our stakeholders needs. This monitoring includes evaluation of the regulatory environment, our employee's well-being, our customer's needs and our raw material supplier's ability to meet our on-going demands. Accordingly, we have established a rolling 4 week window for making such evaluations.

**As of today, March 19, 2020, Sunbelt sees no change in its ability to produce and ship its normal line of products to its existing customer base, through April 19, 2020.**

This forecast will be updated on a weekly basis.
