

## Navipol® HF Special Dyes for Low Carbon Liquid Fuels

### For Petroleum Products and Industrial Applications

**Navipol® HF Special** Liquid Dyes are synthesized and standardized to meet the most stringent environmental requirements of both the US, Canada and Europe. These formulations eliminate the use of traditional hydrocarbon solvent systems and reduce/ eliminate their sulfur/naphthalene levels, while retaining the same high color strength and ease of use associated with traditional liquid dyes.

**Our Navipol® HF Special** Liquid Dyes are suitable for use in those jurisdictions that are seeking to reduce the lifecycle carbon intensity (the amount of GHGs per unit of energy) of liquid fuels.

**Navipol® Red 164 TDP** and **Navipol® Red 164 HF2** are compliant with Appendix 8 of *The Official Journal of The European Union for Azocolourants*.

#### Petroleum Applications:

- Compliance with Federal non-taxes Diesel and Kerosene Dyeing Regulations (26 CFR 48.4082-1)
- Coloration of Bio diesel and Bio diesel/Heating Oil blends
- Automatic Transmission Fluid
- Lubes
- Greases

#### Industrial Applications

- Candle Wax
- Color Coding of Solvents
- Mining Industry
- Solvent Based Inks and Coatings
- Leak Detection
